

# Commingled Recycling

## What is Commingled Recycling?

Also known as “Dual Stream Recycling”, commingling is the process of separating fibers (cardboard, office paper, newspaper, etc.) from rigids (soda cans, tins/steels, glass, plastics and cartons). This process is seen to be more cost effective and leads to lower contamination rates.

## WHAT CAN BE COLLECTED TOGETHER?

<p><b>Cartons</b></p> <p>Juice, Milk, Broth, Wine</p> 	<p><b>Aluminum</b></p> <p>Aluminum cans/bottles</p> 	<p><b>Glass</b></p> <p>Bottles &amp; Jars</p> 	<p><b>Tin &amp; Steel</b></p> <p>Food cans &amp; empty aerosol cans</p> 	<p><b>Paper Cups</b></p> <p>Coffee &amp; Soda Cups (No Lids or Straws)</p> 
<p><b>#1 Plastics</b></p> <p>Water, soda, other liquids (bottle form)</p>  <p>PETE</p>	<p><b>#2 Natural Plastics</b></p> <p>Milk jugs</p>  <p>HDPE</p>	<p><b>#2 Colored Plastics</b></p> <p>Detergents, cleaning supplies, coffee containers</p>  <p>HDPE</p>	<p><b>#5 Plastics</b></p> <p>Cottage Cheese, Yogurt, Cream Cheese (Container Form)</p>  <p>PP</p>	

Plastic bags are **NOT** recyclable. Please find plastic bag drop-offs at local grocery store. Also, please consider to use reusable or paper bags.

3, 4, 6 & 7 plastics are **NOT** recyclable. Please dispose in trash where material will be burnt for energy at the Xcel Energy French Island Waste to Energy Facility.

## WHAT NEEDS TO BE SEGREGATED AND PLACED IN A SEPARATE CONTAINER?

**Fibers**

Office paper, news paper, magazines, cardboard, cereal boxes

**WHEN IN DOUBT, TOSS IT OUT!**
